
Ultra H₂ Molecular Generator

Scientific Guide & Product Information

by Alliance in Motion Global

1. Introduction

The **Ultra H₂ Molecular Generator** by **Alliance in Motion Global** is a revolutionary device that transforms regular water into **molecular hydrogen-rich water**. Backed by advanced Japanese electrolysis technology, it is designed to provide **therapeutic levels of hydrogen**, offering health benefits such as reduced oxidative stress, inflammation control, and better energy metabolism.

2. How the Ultra H₂ Generator Works

The device utilizes **PEM (Proton Exchange Membrane)** and **SPE (Solid Polymer Electrolyte)** technology to **split water (H₂O)** into hydrogen (H₂) and oxygen (O₂).

-

Oxygen is released, while hydrogen is infused into the water.

-

-

The resulting hydrogen-rich water is ready for drinking within **3–5 minutes per cycle**.

-

This process is completely safe, efficient, and requires no chemicals or additives—just clean water.

3. Duration and Output

-

Each session takes **3 to 5 minutes** to generate **up to 1.5 ppm of molecular hydrogen**.

-

-

Two sessions can be used back-to-back for higher saturation.

-
-

The device runs on a rechargeable battery and can be used multiple times a day.

-

4. Scientific Research & Benefits

Molecular hydrogen (H₂) has been the subject of over **800 scientific studies** across more than **170 disease models**. It is:

-

A **selective antioxidant** that neutralizes harmful free radicals without affecting good ones.

-
-

Known to support:

-

-

Neuroprotection (e.g. Parkinson's, Alzheimer's)

-
-

Inflammation reduction

-
-

Muscle recovery & energy

-
-

Hydration & skin health

-

○
Metabolic support (e.g. diabetes, obesity, cholesterol)

○
Hydrogen water is considered **safe, non-toxic**, and easy for the body to absorb.

5. Frequently Asked Questions (FAQs)

Q: Does it have side effects?

A: No. Hydrogen water is naturally safe. Any excess hydrogen is simply exhaled.

Q: Can I overdose on hydrogen water?

A: No. There's no overdose risk. The body uses what it needs and eliminates the rest.

Q: Does the device expire or spoil?

A: The device is durable, but the **electrodes may wear out** over 1–3 years. Regular cleaning is recommended.

Q: Does it cure all sicknesses?

A: No. It is **not a cure**, but it supports wellness. It should be used alongside proper medical care.

Q: What conditions has it helped?

•

Minor: fatigue, skin dryness, dehydration, hangovers

•

•

Major (as support): type 2 diabetes, arthritis, asthma, neurodegenerative diseases, and oxidative stress-related illnesses

•

6. Summary of Device Specifications

Feature	Details
Hydrogen Output	1100 – 1500 ppb per 3 – 5 min cycle
Battery	Rechargeable (3.7V, 1600 mAh)
Technology	PEM/SPE Electrolysis

Feature	Details
Material	Platinum-coated titanium plates
Volume Capacity	~500 ml
Lifespan	1 - 3 years (replaceable parts)
Origin	Japan-designed, Korea-manufactured
